

The Homeowners Association of Maisons En Mer Townhome Development in North Raleigh just went through a contracting experience with Evolutionary Decking, Inc for the construction of a pedestrian bridge over a spillway. This was a very satisfying experience. They handled every aspect of the process in a prompt and professional manner. The quote was competitive, thorough and timely. We needed an engineer to engineer the bridge and they had an associate that was reasonable and prompt. Their workers worked hard and the end result was outstanding, beyond our expectations. I would strongly recommend them for any work . . . if anyone have questions feel free to call me. Frank and Tracey are "good people" who know what they are doing!
